

# Provider Notice

**From:** Magellan Healthcare

**Subject:** TEDS federal data collection requirements

**Attention: New Change in provider requirements related to TEDS federal data collection.**

## **TEDS data collection**

Magellan received a new directive from the Idaho Department of Health and Welfare (IDHW) on Oct. 16, 2024, regarding TEDS federal data collection requirements.

Effective immediately, and until further notice:

- Medicaid-funded members *will no longer* require providers to collect TEDS federal data collection.
- Providers *will need to continue* collecting TEDS federal data for members of all ages receiving other state-funded services.
- Providers *will need to continue* collecting TEDS federal data for members of all ages receiving braided funding from both, Medicaid and other state-funded services.

Other state funding information can be found in Magellan’s Idaho Behavioral Health Plan (IBHP) Provider Handbook Supplement under “[Screening for other state funding eligibility](#)”.

## **Next steps**

Magellan will work diligently to update the provider requirements in all provider resources. Magellan will work to update provider training and outcomes & assessments tools to comply with this new change (if necessary).
